

BENCH MARKING

MONITORING CRITICAL DRIVERS

“The most critical part of Execution is determining the Critical Drivers. Critical Drivers are not KPIs. A KPI is an “after the fact” measurement or effect. A Critical Driver is a cause. Your cholesterol is a KPI, your diet and exercise are the Critical Drivers. Anytime the effect you desire is missing, so is the cause; therefore, measuring and managing the causes (Critical Drivers) is of greater importance than measuring the effects (KPIs). KPIs tell you where you are, but don’t tell you how you got there or what to change to get someplace else.

You cannot manage or change a result without managing and changing the activities that produced that result, and these activities are called Critical Drivers. The primary reason Critical Drivers are so important is this:

What gets measured is what gets done.
What gets measured is what gets managed.
What gets measured and reported can change exponentially.

If you are unhappy with the outcomes/results, then change, measure and manage the Critical Drivers.

There is nothing easy or fast about creating Critical Drivers...THINK!

1. When you have a bad month financially, what are the reasons? What has happened that shouldn’t have happened or what didn’t happen that should have happened.

1. _____
2. _____
3. _____
4. _____
5. _____

2. What are the significant revenue drivers in your business? This would be volume or size or sales or deals in the pipeline (backlog) related.

1. _____
2. _____
3. _____
4. _____
5. _____

3. What are the most significant determinants of your number of sales?

1. _____
2. _____
3. _____
4. _____
5. _____

4. What are the most significant, controllable or variable expenses in your business?

1. _____
2. _____
3. _____
4. _____
5. _____

5. What are the choke points or bottlenecks in your business? These are things that will slow you down or stop the orderly flow of your business or will keep you from reaching your targets.

1. _____

2. _____

3. _____

4. _____

5. _____

6. Who is the person, on the ground, who is specifically responsible and accountable for each of the below?

1. Bad things that happen: _____

2. Revenue Drivers: _____

3. Sales: _____

4. Expenses: _____

5. Choke Points: _____

7. How frequently do each of the above need to be measured or monitored for you to stay on schedule?

1. Hourly: _____

2. Daily: _____

3. Weekly: _____

4. Semi-monthly: _____

5. Monthly: _____

6. Quarterly: _____

7. Semi-annually: _____

8. Annually: _____

Does the person responsible know the rules of delegation?

Does each person who is responsible have his/her compensation tied directly to the results produced...both positively and negatively?

What gets measured is what gets done.

Corollary: What gets measured is what gets managed.

Inspect what you expect.

Scoreboards and dashboards minimize the debate and interpretive discussion 3 months from now. Everyone is aware of status, progress and gap.
