How Much MONEY					
WHEN/DATE					

RANKING					
---------	--	--	--	--	--

Time = Elapsed calendar time from today?

Effort = Hours (or percentage) of your time involved?

Money = Resource investment required? (People or money)

Price Tag = What activity must either stop or start? What will get sacrificed by choosing this option? (Hint: It is out of your comfort zone.)

Competence = Where does it fall within your execution intelligence and existing expertise?

Risk = Probability of Success & Cost of Failure?

Acceptable Consequence = Is the price of failure worth the risk of reward? Is the juice worth the squeeze?

EQUALS

How Much Money = What is the monetary payoff of this option?

When/Date = Realistically, when will the results or payoff most likely occur?

Rank = Based on all the factors and considerations above, including your relative subjective weightings, on a scale of 1-10, how do these options stack up?
