Test Card

Interview Nurses

Deadline

Assigned to

Duration

STEP 1: HYPOTHESIS

We believe that

wireless pulse oximetry more convenient than traditional pulse oximetry

STEP 2: TEST

To verify that, we will

interview nurses

STEP 3: METRIC

And measure

percentage of positive feedback

STEP 4: CRITERIA

We are right if

more than 60% have positive feedback

Test Card

Interview Mothers

Deadline

Assigned to

Duration

STEP 1: HYPOTHESIS

We believe that

We believe that parents are ready to adopt and buy a wireless baby alarm

STEP 2: TEST

To verify that, we will

Interview parents

STEP 3: METRIC

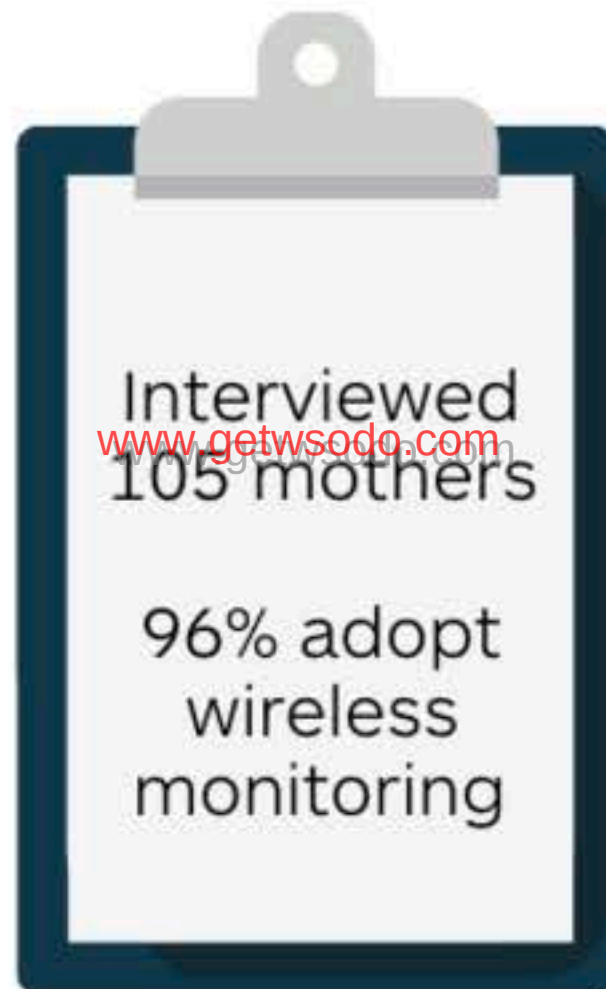

And measure

Percentage of adopting parents

STEP 4: CRITERIA

We are right if

More than 75% would adopt and buy a wireless baby alarm

STEP 3: LEARNINGS AND INSIGHTS

From that we learned that

STEP 4: DECISIONS AND ACTIONS

Therefore, we will

Test Card

MVP (Video on Website)

Deadline

Assigned to

Duration

STEP 1: HYPOTHESIS

We believe that

A smart bootie is convenient and easy to use for monitoring

STEP 2: TEST

To verify that, we will

Build a low-fi MVP, with a video on a website

STEP 3: METRIC

And measure

Number of positive comments

STEP 4: CRITERIA

We are right if

We receive more than 100 positive comments

Test Card

Survey Mothers (1)

Deadline

Assigned to

Duration

STEP 1: HYPOTHESIS

We believe that

Parents want to rent the product,
versus buy at \$200 sales price

STEP 2: TEST

To verify that, we will

Conduct a survey with mothers and ask
what they'd expect to pay

STEP 3: METRIC

And measure

How much mothers
pay for a baby alarm

STEP 4: CRITERIA

We are right if

Mothers don't want to pay
\$200 for a baby alarm

Learning Card
