

Owlet Case Study

How Could Owlet Pivot their Business Model?

Total time: 20 minutes

To avoid a long wait time, and spending a large sum of money for the FDA approval, Owlet needs to pivot the design of their business model and value proposition.

What's holding them back is the alarm. How could they pivot their idea so they can launch something more minimal and less risky to the market in a shorter period of time?

Directions:

- 1. Watch the video snippet.
- 2. How could Owlet pivot their business model without the alarm? Which new customer segment could Owlet target? And which new value proposition could address the new customer segment? Update Owlet's [Business Model Canvas](#) and [Value Proposition Canvas](#).
- 3. Based on your new design, what new hypothesis would they need to test? Capture the hypothesis in the workbook below.

Owlet's new hypothesis
