Your Turn - Build a Presentation

After spending time testing your business idea, gather all your evidence and prepare a presentation for a decision maker, investor, or mentor.

Download the template to put together your own presentation with the key findings from testing your business idea.

What You Will Need:

Evidence from testing

Your BMC & VPC

Innovation Project
Scorecard

Directions

1. Download the presentation template

Keynote template

PowerPoint template

2. What are the circumstances of your pitch?

Who you are pitching your idea to will determine the length and structure of your presentation. Our template is designed for a 10-15 minute presentation at a structured networking event or competition. But sometimes you may only have a couple of minutes to pitch to a major angel investor you meet at the airport.

3. What else to prepare

Depending on the circumstances of your presentation, you may be asked to provide additional information, such as:

- Roadmap: How will you use the money, major milestones

in the next 3-12 months, time to market, etc.

- Financial documents: revenue projections, operational expenses, cash flow, etc.
-

- Research data: competitors, market forces, etc.
-

- Technology stack (if you have one)
