In this activity, you will prototype a business model by applying one of the five attached Business Model Constraint Cards to your existing business model.

To do this exercise:

1. Retrieve your existing business model you have been working on.
2. Pick one constraint from the attached selection of Business Model Constraint Cards.
3. Get a clean copy of the [Business Model Canvas](#).
4. Set your timer to 10 minutes.
5. Prototype an alternative business model following the constraint outlined in the card you picked.
6. To continue your practice, pick another constraint card and repeat the exercise.
