

In the previous lesson, you mapped out the customer's jobs-to-be-done. Complete the Customer Profile by adding the pains and gains.

To do this exercise:

- Retrieve the Customer Profile that you started working on and add the customer pains and gains on sticky notes.
- Use the [customer pains trigger questions](#) if you need help listing your customer's pains.
- Use the [customer gains trigger questions](#) if you need help listing your customer's gains.
- Remember to go deep on customer pains and gains. The more you have, the better your understanding of your customers.
